Clac H 001

BUILT FOR DURABILITY

Clac H 001

Advanced central release bearings engineered for precision, built for durability

High performance and durability

Engineered for extreme conditions, these bearings ensure smooth clutch disengagement and extended vehicle life.

Compact and lightweight design

Ideal for modern compact vehicles, these bearings maintain reliability under pressure, making them perfect for the aftermarket with minimal maintenance requirements.

OEM-Quality for the aftermarket

Offering OEM-grade quality, these bearings are designed for repair shops and fleet operators, providing durability and reduced maintenance costs in tough driving conditions.
