

Flywheels

SUPERIOR PERFORMANCE IN EVERY TURN

Flywheels

Produced under the OE conditions of raw material casting and machining tolerance.

Superior durability and performance

Manufactured from high-grade materials, Fersa Flywheels ensure maximum strength and longevity. Designed to optimize engine performance, they provide smooth power delivery, improved acceleration, and better fuel efficiency.

Precision engineering

Using state-of-the-art manufacturing processes, our Flywheels are engineered to reach high standards, ensuring perfect balance and alignment. This reduces vibrations and enhances overall vehicle stability.

Lightweight and reliable design

Crafted to be lightweight without compromising strength, Fersa Flywheels improve vehicle handling and response. Rigorous testing and quality checks guarantee a reliable, optimal performance for your maximum tranquility.

PRODUCT LIST

FERSA PART NUMBER	OEM	OEM P/N
FW 001	Volvo	21184666
FW 002	Volvo	21630898
FW 003	Scania	1776466
FW 004	Scania	1487558
Under development	Detroit	4720300705
Under development	Detroit	4710307005
Under development	Mercedes	9060303005
Under development	Mercedes	9060303205
