

Mercedes Benz Fersa Solutions

DIFFERENTIAL, GEARBOX, WHEEL END

FERSA is the automotive division specialized in commercial vehicles of Fersa, a globally recognized group headquartered in Europe. As a leading manufacturer, Fersa specializes in producing high-quality bearings, delivering excellence and reliability to the automotive industry worldwide.

Get to know Fersa

- **Global Innovation:** 6 manufacturing plants and 4 R&D centers drive our advanced bearing solutions.
- **OEM Quality:** Our bearings meet stringent quality standards, ensuring reliability and performance.
- **Global Reach:** Sales in over 100 countries, providing high-quality products wherever needed.
- **Cross-Selling:** Extensive product range offers significant opportunities for comprehensive solutions.
- **Rapid Development:** Synergy between PFI and Fersa ensures fast and precise development of new technologies.

We are committed to deliver innovative, efficient, and reliable bearing solutions for the automotive, heavy-duty, wind energy, railway, and agricultural industry sectors.

Our essence

It's not what we do, it's how we do it.

Our commitment includes:

Technical support

Expert assistance to resolve any technical issues.

Academy on the road

Fersa Care - Technical training to mechanics.

Immediate stock availability

Ensuring our products are readily available to meet your needs.

Regional team service

Dedicated customer and engineering support at Brazil, USA, India, and Europe.

In house bearing production

Automatic assembly line - Under installation.

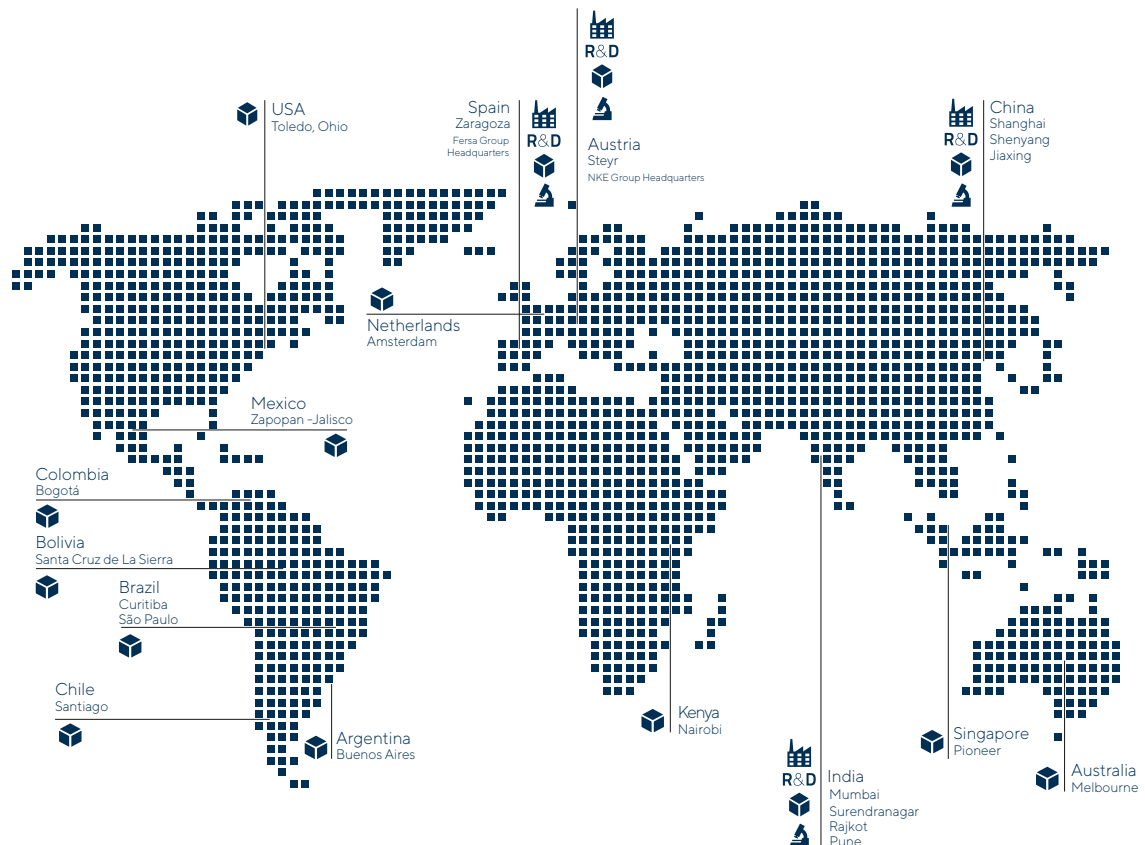

Innovation and reliability

Extensive field testing with technical expertise. Testing facilities, R&D capabilities.

Global presence

In the right place at the right time.

Local presence in more than 100 countries.

Fersa Heavy-Duty

Specialists in bearings and other component solutions for heavy-duty and industrial vehicles. We offer custom solutions for original equipment manufacturers and the best quality and latest technology for the aftermarket.

Fersa bearings are manufactured to OEM specifications; starting with the specifications of the raw material to the heat treatment processes, as well as optimized design features.
